

Identifying and Classifying Angles

Visual Practice

Geometry – Grade 6

Directions: For each angle or picture below, determine the type of angle.
Choose from: **acute**, **right**, **obtuse**, or **straight**.

1 Look at each angle. Estimate or measure the angle, then classify it.

1.  Type: _____ Measure: _____	2.  Type: _____ Measure: _____	3.  Type: _____ Measure: _____	4.  Type: _____ Measure: _____
5.  Type: _____ Measure: _____	6.  Type: _____ Measure: _____	7.  Type: _____ Measure: _____	8.  Type: _____ Measure: _____

2 Look at each real-world image. Estimate the angle formed by the highlighted lines. Classify the angle.

a.  Type: _____ Measure: _____	b.  Type: _____ Measure: _____	c.  Type: _____ Measure: _____	d.  Type: _____ Measure: _____
---	---	---	---

3 Draw an example of each type of angle. Label and measure each angle.

Acute Angle Measure: _____	Right Angle Measure: _____	Obtuse Angle Measure: _____	Straight Angle Measure: _____
