Shade and Compare Fractions with Models

Shade the models to represent each fraction. Then compare the fractions using $<$, $>$, or $=$.

1. Circle Models

A. Shade $\frac{2}{3}$.

B. Shade $\frac{3}{4}$.

C. Shade $\frac{5}{6}$.

2. Rectangle Models

A. Shade $\frac{3}{5}$.

$\frac{3}{5}$ $\frac{2}{5}$

B. Shade $\frac{2}{3}$.

$\frac{2}{3}$ $\frac{1}{3}$

C. Shade $\frac{4}{6}$.

$\frac{4}{6}$ $\frac{1}{2}$

3. Number Line Models

A. Shade $\frac{1}{2}$ on the first number line and $\frac{3}{4}$ on the second number line.

$\frac{1}{2}$ $\frac{3}{4}$

B. Shade $\frac{2}{3}$ on the first number line and $\frac{1}{3}$ on the second number line.

$\frac{2}{3}$ $\frac{1}{3}$

C. Shade $\frac{3}{5}$ on the first number line and $\frac{4}{5}$ on the second number line.

$\frac{3}{5}$ $\frac{4}{5}$

4. Word Problems

A. Shade the models to represent the fractions. Then compare.

$\frac{2}{4}$

$\frac{3}{8}$

$\frac{2}{4}$ $\frac{3}{8}$

B. Shade the models to represent the fractions. Then compare.

$\frac{1}{3}$

$\frac{2}{6}$

$\frac{1}{3}$ $\frac{2}{6}$
