

Long Division: Two-Digit by One-Digit

Name: _____

Date: _____

Instructions: Use the long division method to solve each problem. Show your working in the space provided.

1. $48 \div 4 =$ _____

$$\begin{array}{r} 4 \overline{) 48} \\ \end{array}$$

2. $63 \div 7 =$ _____

$$\begin{array}{r} 7 \overline{) 63} \\ \end{array}$$

3. $56 \div 8 =$ _____

$$\begin{array}{r} 8 \overline{) 56} \\ \end{array}$$

4. $72 \div 6 =$ _____

$$\begin{array}{r} 6 \overline{) 72} \\ \end{array}$$

5. $84 \div 7 =$ _____

$$\begin{array}{r} 7 \overline{) 84} \\ \end{array}$$

6. $45 \div 5 =$ _____

$$\begin{array}{r} 5 \overline{) 45} \\ \end{array}$$

7. $96 \div 8 =$ _____

$$\begin{array}{r} 8 \overline{) 96} \\ \end{array}$$

8. $54 \div 6 =$ _____

$$\begin{array}{r} 6 \overline{) 54} \\ \end{array}$$

★ Challenge Problems:

9. $91 \div 7 =$ _____

$$\begin{array}{r} 7 \overline{) 91} \\ \end{array}$$

10. $88 \div 4 =$ _____

$$\begin{array}{r} 4 \overline{) 88} \\ \end{array}$$
